safe & convenient

RBT's Mobile Wallet – a safer way to use your RBT debit card

At Rollstone Bank & Trust, we're committed to providing you with the latest in technology, including tools and techniques to keep you and your accounts safe. Mobile Wallet allows you to make contactless purchases at participating merchants with a virtual RBT debit card. In addition to minimizing contact, Mobile Wallet is also more secure than carrying your card with you for two main reasons:

1. *PIN or biometric authorization.* During the transaction, you will be prompted for verification via PIN or a biometric marker such as your fingerprint. This ensures that only you will be able to approve payments.
2. *Tokenization.* This is the process of creating a unique digital code as a stand-in for your physical card, so that confidential financial information is not stored on your phone.

[How do I use mobile wallet?](#)

[Expand](#)

Setting up and using mobile wallet is easy. On your compatible device:

- Scan your card or manually input your card information into your mobile payment app.
- Apple Pay users – hold your phone near the card reader and, when prompted, enter your PIN or scan your

fingerprint or face.

- Samsung and Google Pay users – select your preferred card inside the app, then follow the steps for Apple Pay.

To tell if a merchant accepts mobile wallet payments, look for the “contactless” icon or the logo of your preferred mobile wallet service.

[Apple Pay](#)

[Expand](#)

Adding your card to Apple Pay is simple:

1. Open the Wallet app.
2. Tap the plus sign in the upper right corner.
3. Choose “Credit or Debit Card” then scan your RBT debit card, or manually enter the card information.
4. Enter the card expiration date and 3-digit security code.
5. Agree to the Terms & Conditions.

You can also choose to make your RBT debit card the default card for Apple Pay.

Paying in stores

Apple Pay is the easy, secure way to pay in stores, in apps, and online with your iPhone, Apple Watch®, and iPad®. You can quickly check out with Touch ID® or Face ID® using the devices you carry every day.*

Paying in apps and on the web

Use Apple Pay to make purchases in all kinds of apps on your iPhone and iPad. Paying is as simple as selecting Apple Pay at checkout and completing the payment using Face ID or Touch ID.

Apple Pay is also the easy, secure way to pay online in Safari® on your iPhone, iPad, and Mac®, as you no longer have to create an account or fill out lengthy forms. Simply pay and go. You can also pay on your MacBook Pro® using Touch ID.*

Accepted in great stores

Look for the contactless and/or Apple Pay symbol when you want to make in-store purchases.

It's secure and private

When you add your RBT Mastercard to Apple Pay, it assigns a unique Device Account Number instead of your actual card number.

Plus, you can also get added peace of mind with the other security benefits that come with your card – such as [Mastercard ID Theft Protection](#)^{™†}.

*Apple Pay works with iPhone 6 and later in stores, apps, and websites in Safari; with Apple Watch in stores and apps (requires iPhone 6 or later); with iPad Pro, iPad (5th generation), iPad Air 2, and iPad mini 3 and later in apps and websites in Safari; and with Mac (2012 or later) in Safari

with an Apple Pay – enabled iPhone or Apple Watch. For a list of compatible Apple Pay devices, see support.apple.com/km20715.**Certain terms, conditions and exclusions apply. Contact your issuing financial institution for complete coverage terms and conditions or call 1-800-MASTERCARD for assistance. Google Pay with your RBT Mastercard® Debit Card.

Google Pay brings together everything you need at checkout and keeps your payment info safe in your Google Account until you're ready to pay.

Get the app today.

[Download Google Pay](#)

Simple Setup

Adding your RBT Mastercard debit card to Google Pay takes just a few minutes. First, download the app from Google Play or check to see if it's already installed on your phone. Then, open the app and follow the instructions. Google Pay works on Android devices running KitKat 4.4 or higher.

Easy to Use

Google Pay works anywhere you see this symbol at checkout. Just unlock your phone and hold it near the terminal. You don't even need to open the app.

[Stores and apps that accept Google Pay](#)

Extra Security

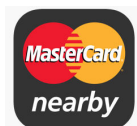

When you use your phone to pay in stores, Google Pay doesn't send your actual credit or debit card number with your payment. Instead, a virtual account number is used to

represent your account information – so your card details stay safe.
